

2023 Floodwater Delivery Notice

Consolidated Irrigation District (CID) will begin diverting Kings River floodwater on Thursday, February 23, 2023. Initial deliveries will be focused on filling canals and groundwater recharge basins. A follow up notification will be sent when CID irrigation deliveries can be scheduled.

Church irrigation deliveries will begin on Monday, February 27, 2023. Church water users should contact their Irrigation Specialist to schedule water delivery.

While current snowmelt projections indicate an above average water year, it is still too early to project how long the CID and Church water season will last.

If you have any questions or need assistance contacting your Irrigation Specialist, please call the District Office at (559) 896-1660.
